Practical-11

Student Management CRUD with Search and Filter

Theory :

1. **Are SELECT, INSERT, UPDATE, and DELETE operations working?**

Answer: Yes, all four database operations are working correctly to view, add, update, and delete records.

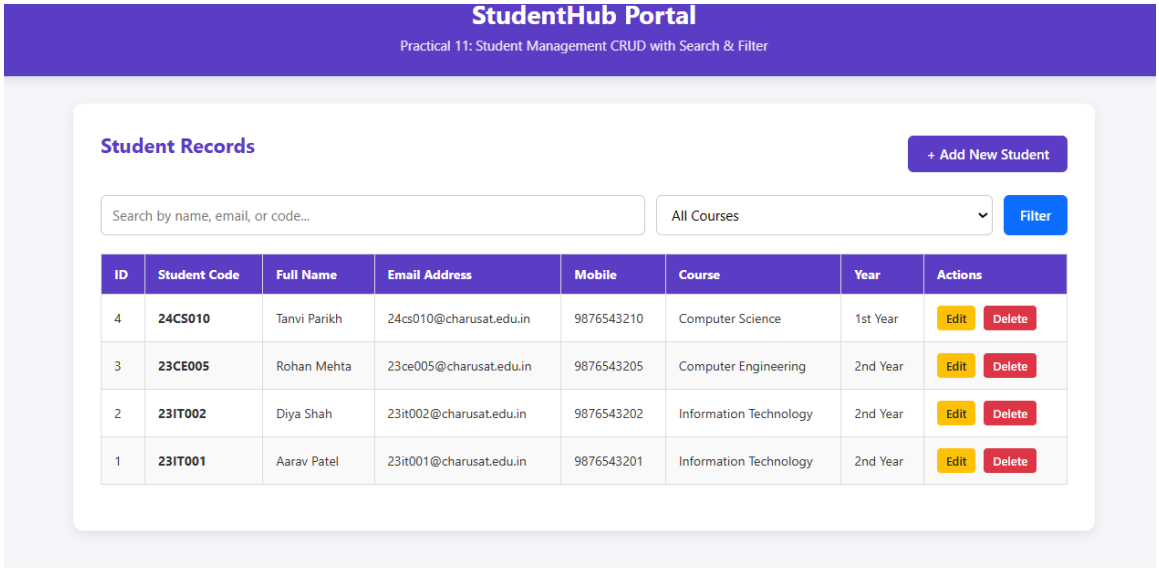

2. **Is search by name/email/course implemented?**

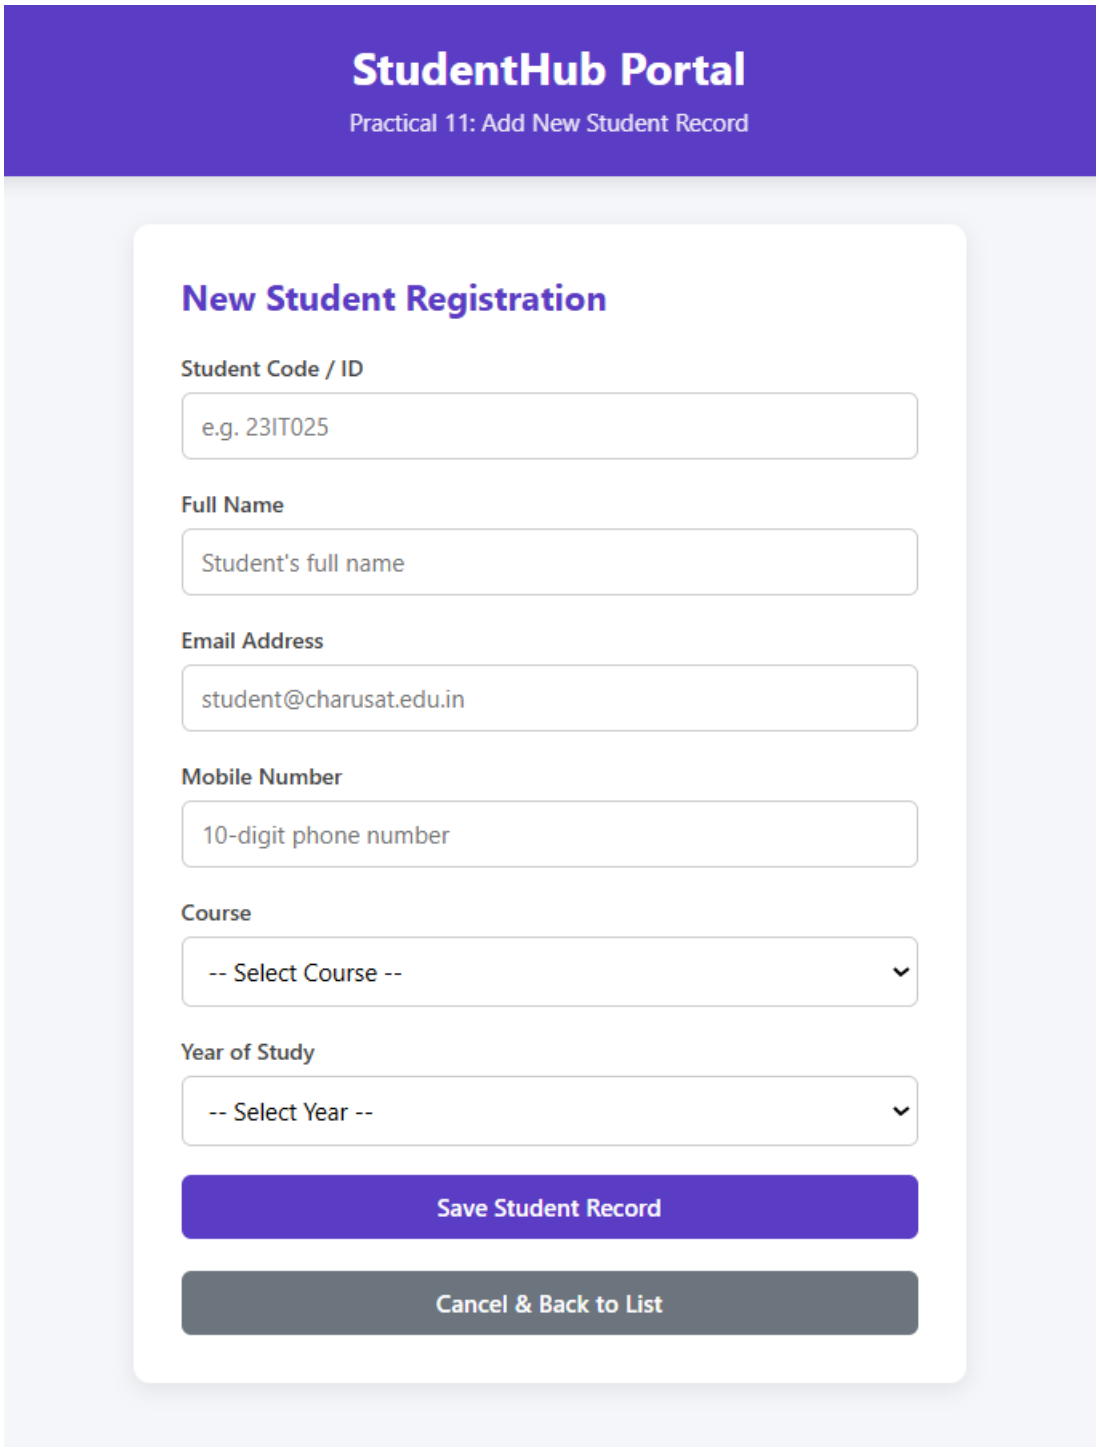

Answer: Yes, the search functionality allows users to find records using name, email, or course.

3. **Are delete operations confirmed before execution?**

Answer: Yes, a confirmation message is displayed before deleting a record to prevent accidental deletion.

Challenges Faced: I faced difficulties in implementing CRUD operations using PHP and MySQL. I struggled with implementing search and filter functionality for student records. I also faced challenges in handling delete confirmations and displaying success or failure messages.

Learning Outcome:- I learned to perform INSERT, SELECT, UPDATE, and DELETE operations using PHP and MySQL.
I understood how to implement search and filter functionality for student records. I also learned to handle user confirmations and display appropriate messages after database operations.
