

Practical - 1

Practical Title: Project Initiation, Requirement Analysis, Sitemap, Wireframe, and GitHub Setup

Problem Definition: Initiate the semester-long StudentHub portal by identifying the problem scope, user roles, key modules, navigation flow, and minimum 10 pages. Create a sitemap, low-fidelity wireframe, project folder structure, README file, and GitHub repository.

A. Theory

1. What is URL and parts of URL?

Answer: A URL (Uniform Resource Locator) is the web address of a page. Its main parts are protocol (https://), domain name, path, and file name/query.

2. How does HTML file process in web browser?

Answer: The browser reads the HTML file, builds the page structure, applies CSS for styling, and executes JavaScript for interactivity before displaying the webpage..

3. How will page navigation flow managed among all HTML pages?

Answer: Navigation is managed using hyperlinks (<a> tags) and a common navigation bar on every page for easy access.

4. How will GitHub commits be maintained after each practical?

Answer: A separate commit is made after completing each practical with a clear commit message to track changes and project progress.

Implementation/ Output/Result

Requirement Analysis

The StudentHub portal is designed to provide a centralized platform for students to access academic and campus-related information. The system includes modules like login, registration, dashboard, profile, attendance, events, feedback, and admin management. The requirements include creating a user-friendly, responsive, and accessible website with a minimum of 10 pages.

Evidence of Work (Screenshots)

Site – Map

A wireframe diagram of a login page titled "Student Hub Portal". The page is set against a dark grid background. A large rounded rectangle contains the main content area. At the top center of this area is a rectangular box labeled "Student Hub Portal". Below it, on the left side, are four stacked input fields: "Username", "Password", "Login", and "Back". To the right of the "Login" field is a "Clear" button. At the bottom of the main content area is a long horizontal bar labeled "Footer". A vertical dashed line runs down the center of the page, passing through the "Student Hub Portal" title and the "Footer" bar.

A wireframe diagram of a registration page titled "Student Hub Portal". The layout is similar to the login page, with a dark grid background and a rounded rectangle for the main content. At the top center is a box labeled "Student Hub Portal". Below it, on the left, are four stacked input fields: "Username", "Password", "Re-enter Password", and "Back". To the right of the "Re-enter Password" field is a "Clear" button. At the bottom of the main content area is a long horizontal bar labeled "Footer". A vertical dashed line runs down the center of the page, passing through the "Student Hub Portal" title and the "Footer" bar.

GitHub Repository Link:

<https://github.com/ShyamPatel9/Student-Hub-Portal>

Challenges Faced:

Planned the project structure and navigation.
Created the sitemap, wireframe, and GitHub repository.

Learning Outcomes:

Learned project planning and website structure.
Understood navigation flow and GitHub version control.
Improved website organization skills.
